

DLSU'S PROFS TO PICK

VIEW ALL TEACHERS

Upon visiting the web page, a user, who may or may not have an account may view the listings of all professors on the web page, sending the user to the professor's main page where the user may further investigate the professor's credentials, background, and total rating.

VIEW TEACHER REVIEWS

A user may also opt to view all reviews related to a certain professor by showing the user to the compilation of all reviews towards the chosen professor. The overall rating of the professor will also be shown, as well as the average rating for each course.

CREATE AN ACCOUNT

A user can have the option of registering themselves and creating an account. Users that choose to create an account must fill up a form as a method of validation and such. A user need only a username, password, ID number and a DLSU email to join.

VIEW PROFILE

A user can have the option of viewing any registered user's account, where he or she will see his username and email, as well as recent reviews the user has written.

LOG IN

A user, if he or she has an account, may log in to the web page by simply inputting their username/email and password.

LOG OUT

A user will be given the option of logging out of their account, removing any account-exclusive actions available ex. posting etc.

SEARCH

A user may search for a certain professor from the listings available within the web page.

RATE PROFESSORS

A registered User may post a review on a certain professor. he or she simply must give the name of the professor, the course taken under them, the body of the review and the numerical rating.

DELETE REVIEW

A registered User can delete any review they have posted on the web page.

EDIT REVIEW

A registered User can edit any review they have posted on the web page.

FILTER PROFESSORS

A user may opt to filter and segregate the professor listings on the webpage per course/subject for easier searching and the like.

GENERAL GOOD USER EXPERIENCE

Visitor can easily navigate without help; all information is easy to access. Good visual design. Design suits the theme of the application and is cohesive and consistent across the whole application.
